Learning Objectives
At the conclusion of this course students will:

- Understand the definition of user experience
- Apply the process of creating a usable experience
- Apply the principles of cognitive processing and user behavior
- Perform multiple research methods
- Understand multiple usability testing methods
- Conduct usability tests at two levels using at least one usability testing method
- Create a low-fidelity and medium-fidelity wireframe
- Analyze research data to guide content, navigation and design decisions
- Create navigation structures
- Implement a content strategy

Submitting Work
All assignments and projects need to be submitted through Canvas, the university’s learning management system. Canvas is also where you will find due dates, reading assignments and descriptions for all work each week.
Late Work
You will be able to submit one assignment as late (up to five days) for full credit and after that all late assignments will receive 10% off the score for five days. Assignments will not be accepted after five days.

Accommodations for students with disabilities
Any student requiring accommodations or services due to a disability can contact Services for Students with Disabilities (SSD) in room 181 of the Student Services Center. SSD can also arrange to provide course materials in alternative formats if necessary. You may also let me know about any special accommodations you need and I will do my best to meet them right from the start.

For more information about the SSD contact them at 801-626-6413, ssd@weber.edu, or weber.edu/ssd.

Student Code
Any form of academic dishonesty (cheating, plagiarism, etc.) will not be tolerated. Proof of academic dishonesty will result in a failing grade (E) for the course. The following is an explanation of the student code which can be found at weber.edu/ppm/Policies/6-22_StudentCode.html.
