Instructor: Drew Weidman  
Phone: 801-626-7025  
E-mail: dweidman@weber.edu This is the best way to reach me. If you send me a message through Canvas I may not get it. If you really need to reach me, email me at this address.

Classroom: TE 108  
Days and Time: MW 11:30 - 1:20 PM  
Office Hours: MW 11:00 – 11:30, 1:20-2:00; TTh 9:00 – 9:30, 11:20-11:50  

Learning Objectives: Provide an understanding of the basic networking terminology. This will cover the theory of networking, types of network protocols, and wide and local area networks. The student should have a good understanding of network terminology at the completion of the course.

Class: Class will be available online. Each week’s topics will be discussed in a presentation style. I will record lectures and presentation slides that will cover the topics of each chapter. Each week’s lectures will appear in the WSU Online portal on Tuesday. Each student is expected to watch and listen to the contents of the presentation.

Quizzes: There will be weekly quizzes that cover that material for the week. The quizzes may be taken where ever you have Internet access. The idea of the quiz is to encourage you to read the chapters. The answers to the quizzes are found in the assigned chapters. I have found that if I do not require quizzes, students delay reading the class material until the exam. That is too much reading to accomplish and comprehend the material sufficiently for the exam. Each student is required to take the quiz during the week of the chapter discussion. The quizzes will be available through the online testing program found at http://chitester.weber.edu. The quizzes must be taken by following Monday evening at 11:59 PM the week that we discuss the chapters. The quizzes will count for 20% of the total class grade. The quizzes are open book but will be timed (90 minutes per chapter.) This is plenty of time to complete the quizzes. The weeks where we have an exam, there will not be a quiz given. There are no make-up quizzes.

Exams: There will be three exams for the class. Exams count for 60% of the final grade. I will post a review sheet of the topics that will be covered on the exam prior to the date of the exam. This review sheet will help you focus on the material that is important. If it is not on the review sheet, it will not be on the exam. The exams will be given in the campus testing centers (not in your home).

Labs: Labs will account for 20% of the final grade. They will be assigned during the class. Labs are due as shown in the calendar. Labs turned in late are deducted 20% per day.

Student Assistant: I will be using a Student Assistant (SA) to help me grade some of the assignments. The
### Accommodations for disabilities

Any student requiring accommodations or services due to a disability must contact Services for Students with Disabilities (SSD) in room 181 of the Student Service Center.

### Grading

The final grade will be given based on points accumulated through exams and labs. Standard grading will apply: 94.00-100 A; 90.00-93.99 A-; 87.00-89.99 B+; 84.00-86.99 B; 80.00-83.99 B-; 77.00-79.99 C+; 74.00-76.99 C; 70.00-73.99 C-; 67.00-69.99 D+; 64.00-66.99 D; 60.00-63.99 D-; 59.99 or below E.

### Policies

Exams can only be taken on the days given unless arrangements are made to take them ahead of time. I know that things happen which may interfere. Please contact me so I can work with you ahead of time.

**CS Department policy dictates that any verifiable evidence of student academic cheating, as defined and determined by the instructor, will result in:** 1) an automatic failing grade for the class and 2) a report to the Dean of Students that will include the student's name and a description of the student's dishonest conduct.

### Path to Success

Here are some things that I have noticed that you can do to get a passing grade from this class:

1. Always take the quizzes. You may find that you are pushed for time and decide to skip a quiz. These are fairly easy points that you are passing up.
2. Participate in the discussions. Log in several times during the week and read the discussion topics. You will find that you may be able to answer someone else's question or other students may answer your questions. Be an active participant in the class.
3. Use the study guide to prepare for your exams. Answer all questions as you review. When you feel prepared, print out a blank study guide again and go over to see if you can answer the question correctly.
4. Turn labs in on time. Remember that there is a 20% penalty per day that the lab is late.
5. Read the chapters. Listen to the recorded lectures and read the chapters on your own. It will help solidify your understanding of the information.
6. Take the exams on time. If you know that something is going to interfere with an exam, contact the professor ahead of time. I am a lot easier to work with ahead of time rather than after the fact.
7. The best way to contact me is via email. I participate in the discussions, but not as readily as I see my email.
