

## **NET 2200 – Microcomputer Operating Systems**

Instructor: Patrick Beck

Email: patrickbeck@weber.edu

Canvas Email: Please don't use canvas email, I check it irregularly

Phone: 801-626-6522

Office: TE 109A

Office Hours: MWF 11:00am-12:00pm or by appointment

Class Times: MWF 7:30am – 8:20am

### **Course Description**

Study of hardware and software components through managing programs, directories, files, and disks. Includes integrating applications, and customizing the operating system.

### **Course Lab Fees**

Course fees in NET 2200 are designed to cover the costs of computer hardware and software and consumable materials and supplies.

### **Course Outcomes**

At the conclusion of the this course students will be able to complete or have an understanding of the following:

- Install Windows 7, and Linux

- Customize and optimize Windows 7, OS X, and Linux

- Use the Windows 7, OS X, and Linux command lines

- Manage files, directories and permissions in Windows 7, and Linux

- Manipulate data files in Windows 7, OS X, and Linux

- Virtualization vs Emulation

- Basic networking and security concepts in all operating systems

### **Textbooks**

Microsoft® Windows® Operating System: Essentials

By: Tom Carpenter

Publisher: Sybex

Pub. Date: February 1, 2012

Print ISBN: 978-1-118195529

Apple Pro Training Series: OS X Support Essentials

By: Kevin M. White

Publisher: Peachpit Press

Pub. Date: November 15, 2012

Print ISBN-13: 978-0321887191

## Tools

16GB USB 3 Flash Drive, formatted as exFAT

## Accommodations for students with disabilities

Any student requiring accommodations or services due to a disability must contact Services for Students with Disabilities (SSD) in room 181 of the Student Services Center. SSD can also arrange to provide course materials (including the syllabus) in alternative formats if necessary.

For more information about the SSD contact them at 801-626-6413, [ssd@weber.edu](mailto:ssd@weber.edu), or [departments.weber.edu/ssd](http://departments.weber.edu/ssd)

## Class Schedule Overview

Each week, there will be 3 class periods. MW will be lecture. Fri will be lab time. Weeks with a holiday or break is different. Each lab assignment will be due Friday of the week after it is discussed in class, unless Friday is a holiday in which the assignment will be a Wednesday submission. All assignments are due at 11:59pm on the date listed.

## Final Project

The final project will be worth 300pts. It will encompass components from all of the assignments. More information about the project is forthcoming.

## Grade Scheme

	89 – 87 B+	79 – 77 C+	69 – 67 D+	< 60 E
> 95 A	86 – 83 B	76 – 73 C	66 – 63 D	
94 – 90 A-	82 – 80 B-	72 – 70 C-	62 – 60 D-	

## Extra Credit

I will occasionally give extra credit. It will most often replace portions of an assignment. Please don't ask for extra credit.

## Late Work

You will be able to submit one assignment as late for full credit and after that all late assignments will be given half credit.

## Time Commitment

As a general rule you should spend at least twice as much time outside of class as in class.

## **Tips for Success**

One cannot learn all of the material by just reading the text. Practice is critical when learning new software and programming languages. Successful students read the upcoming material ahead of time. They participate actively in class. If you are struggling with any concept please come see me during office hours. The number one thing you can do is ask questions when you don't understand something.

## **Ethical Conduct**

NMT policy dictates that any verifiable evidence of student academic cheating, as defined and determined by the instructor, will result in: 1) an automatic failing grade for the class and 2) a report to the Dean of Students that will include the student's name and a description of the student's dishonest conduct.

Any form of academic dishonesty (cheating, plagiarism, etc.) will not be tolerated. The following is an explanation of cheating as stated in the student code.

1. Cheating, which includes but is not limited to:
  - Copying from another student's test;
  - Using materials during a test not authorized by the person giving the test;
  - Collaborating with any other person during a test without authorization;
  - Knowingly obtaining, using, buying, selling, transporting, or soliciting in whole or in part the contents of any test without authorization of the appropriate University official
  - Bribing any other person to obtain any test;
  - Soliciting or receiving unauthorized information about any test;
  - Substituting for another student or permitting any other person to substitute for oneself to take a test.
2. Plagiarism, which is the unacknowledged (uncited) use of any other person's or group's ideas or work. This includes purchased or borrowed papers;
3. Collusion, which is the unauthorized collaboration with another person in preparing work offered for credit;
4. Falsification, which is the intentional and unauthorized altering or inventing of any information or citation in an academic exercise, activity, or record-keeping process;
5. Giving, selling, or receiving unauthorized course or test information;
6. Using any unauthorized resource or aid in the preparation or completion of any course work, exercise, or activity;
7. Infringing on the copyright law of the United States which prohibits the making of reproductions of copyrighted material except under certain specified conditions.

Any cheating will result in a failing grade.

## Schedule

Date	Topic(s)	Due
Aug 29, Aug 31	Syllabus and get logged on, hardware	
Sept 2	VirtualBox instruction, test install	
Sept 5	<b>Labor Day Holiday</b>	
Sept 7	OSX installation	
Sept 9		
Sept 12, 14	OSX optimization	
Sept 16		Assignment 1
Sept 19, 21	OSX security and networking	
Sept 23		Assignment 2
Sept 26, 28	Windows history and installation	
Sept 30		Assignment 3
Oct 3, 5	Windows 7 command line and optimization	
Oct 7		Assignment 4
Oct 10, 12	Windows 7 security and networking	
Oct 14		Assignment 5
Oct 17	Windows 7 troubleshooting	
Oct 19		Assignment 6
Oct 21	<b>Fall Break – no class</b>	
Oct 24, 26	Virtualization vs Emulation	
Oct 28		Assignment 7
Oct 31, Nov 2	Linux history and installation	
Nov 4		Assignment 8
Nov 7, 9	Linux command line and optimization	
Nov 11		Assignment 9
Nov 14, 16	Linux security and networking	
Nov 18		Assignment 10
Nov 21	Linux troubleshooting	
Nov 23		Assignment 11
Nov 25	<b>Thanksgiving Holiday</b>	
Nov 28, 30, Dec 2	Final Project	Assignment 12 (Dec 2)
Dec 5,7, 9		Final Project (Dec 9)
