### **Course Overview**

Welcome to WEB 4800! Students will research a topic of choice in a web and user experience related field. The student will individually learn about that topic and practice that topic by doing projects throughout the semester. This is a great opportunity for a student to look into a topic they haven't covered in the WEB UX degree or something they would like to spend more time on becoming proficient.

#### What I Expect From You

This course requires you, the student, to be in control of your learning. Since you are in control, you need to be disciplined enough to stay up to date with the course. The following tips will help you succeed in the course.

- **Canvas Login:** Login to Canvas regularly to view announcements and check your progress. You may need to log in multiple times a day when group submissions/discussions are due.
- **Manage Your Time:** This requires good planning. Good planning allows you to plan for the unexpected sickness, travel requirements, Internet outages etc. Allow for four hours/week in class and you an additional 2-4 hours of work outside the classroom.
- Keep Track of Due Dates: Use the calendar tool on Canvas to keep track of due dates. Print out the schedule at the end of the syllabus, and watch for updates on Canvas.

#### What Your Peers Expect From You

- **Classroom Etiquette:** In any social interaction, certain rules of etiquette are expected and contribute to more enjoyable and productive communication.
- **Netiquette:** The following tips for interacting online are adapted from guidelines originally compiled by Chuq Von Rospach and Gene Spafford.
  - Remember that the person receiving your message is someone like you, someone who deserves and appreciates courtesy and respect.
  - Be brief. Succinct, thoughtful messages have the greatest impact.
  - Your messages reflect on YOU. Take time to make sure that you are proud of their form and content.
  - Use descriptive subject headings in e-mail messages.
  - Think about your audience and the relevance of your messages.
  - Be careful with humor and sarcasm; without the voice inflections and body language of face-to-face communication, Internet messages can be easily misinterpreted.
  - When making follow-up comments, summarize the parts of the message to which you are responding.
  - Avoid repeating what has already been said. Needless repetition is ineffective communication.
  - Cite appropriate references whenever using someone else's words.
- **Manage Your Time:** This requires good planning. Good planning allows you to plan for the unexpected sickness, travel requirements, Internet outages etc. Allow for four hours/week in class and you an additional 2-4 hours of work outside the classroom.
- Keep Track of Due Dates: Use the calendar tool on Canvas to keep track of due dates. Print out the schedule at the end of the syllabus, and watch for updates on Canvas.
